STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/ 2/

Total leaf tobacco stocks smaller than a year ago

Leaf tobacco inventories of dealers and manufacturers in the United States and Puerto Rico totaled 4,435 million pounds as of July 1, 1970. This was 155 million pounds less than the figure a year earlier. All but two domestic types registered declines with flue-cured showing the largest loss. Foreign-grown cigarette and smoking tobacco were also lower. About 35 million pounds, consisting mostly of Maryland and Puerto Rican tobaccos were marketed by growers during the April--June quarter.

Stocks as of July 1, 1970 included 1,250 million pounds (farm-sales-weight) of leaf tobacco under Government loans--67 million pounds above the previous July 1 (1,183 million). Burley accounted for the biggest share of the increase as flue-cured declined. The breakdown on current loan stocks was: flue-cured, 746.9 million pounds; burley, 465.4 million; fire-cured, 13.0 million; dark air-cured, 18.9 million; and cigar leaf, 6.9 million pounds.

1/ Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks. (See table in body of report for reported weight basis). This report is issued quarterly.

2/ All Government loan stocks are reported by Growers Cooperatives, which are considered dealers for stocks-reporting purposes.

CIGARETTE-LEAF STOCKS

Flue-cured, Maryland, and foreign stocks smaller
Burley inventories larger

Stocks of flue-cured tobacco on July 1, 1970 totaled 1,969 million pounds--131 million less than reported holdings last year. The 1969 marketing year for flue-cured ended on July 1 with total disappearance indicated at 1,182 million pounds. Domestic consumption at 648 million pounds was about 24 million below the previous year. Exports were 535 million pounds compared to 525 in 1968-69.

Burley stocks this July 1 were reported at 1,496 million pounds--33 million above the holdings of July 1, 1969.

Maryland inventories totaled 70 million pounds--13.7 million less than July 1. Auction sales of the 1969 crop ended on June 26 with 30.1 million pounds being sold.

Foreign-grown cigarette and smoking tobacco stocks were reported at 428.4 million pounds on July 1, 1970. This was 22.8 million less than was on hand a year earlier.

DARK TOBACCO STOCKS

All types decline

Stocks of fire-cured leaf, reported at 84.4 million pounds on July 1, 1970 were 8.1 million below holdings on the previous July 1. Cigar wrapper had larger inventories while all other types declined. Deliveries of the 1969-70 crop of Puerto Rican tobacco were completed during the quarter. Stocks of foreign-grown cigar leaf as of July 1 amounted to 104.8 million pounds--11.6 million above holdings a year earlier.

3/ The instructions for reporting unstemmed cigar-leaf of the domestic types require that dealers and manufacturers indicate the weight basis on which the tobacco is reported, namely, farm-sales weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of average factors reflecting the percentage reported each quarter in each of these three categories.

1/ Annual disappearance for a type is calculated for the marketing year established for that type, the year beginning on the quarterly reporting date on which stocks of the type are at their lowest point and before the new crop enters stocks.

2/ The carryover stocks have been tabulated separately according to broad groupings of ownership, namely manufacturers, under loan, and all other. "Other" reflects stocks reported by tobacco dealers and stocks held in the United States by representatives of foreign manufacturers. The quantities shown as owned by dealers may include some tobacco held by dealers which is earmarked for sale to domestic manufacturers or for export.

3/ Subject to revision.
